

Open job application

Capi Europe makes exceptional design flower pots for indoor and outdoor use. We supply to more than 70 countries worldwide. Our Dutch production is sustainable and takes place in our own factory in Tilburg. We are an innovative and growing company. In recent years, we have welcomed new production robots, new colleagues and there is room for you too! Together with your colleagues, you will work on Capi Europe's mission: Grow a greener life.

Everything is possible

Within Capi, we have different working areas, allowing us to accommodate people with all kinds of educational and working backgrounds. Part of our collection is made in our own factory in Tilburg, so technical knowledge is very important to us. Our operators are trained internally to work with our own production technology. Besides the production process, our logistics process plays a major role. Various positions at different levels can be filled within our warehouse and logistics handling. From logistics planners to warehouse employees.

In addition, Capi has several positions within various departments such as sales, marketing and finance. For example, our inside sales department is responsible for customer maintenance with customers from more than 70 countries. So within this department, there is always room for multilingual and driven employees to maintain and increase global market sales. Our German and French sales areas continue to grow, offering many opportunities.

Contact us

At Capi, innovation and drive are paramount. Together, we strive for a pleasant and instructive working environment. We are looking for people who identify with this and who want to work together on our mission: Grow a greener life. Can you identify with this? Then contact our HR department hr@capi-europe.com for the possibilities within your educational and/or working area.
